Muhammad Umair Akram

Nationality: Pakistani | **Gender:** Male | **Phone number:** (+92) 3144682004 (Work) | **Email address:** umair.akramcs@gmail.com | **Website:** umair-rai.github.io | **LinkedIn:** umair | **Github:** umair | **Address:** Lahore, Pakistan (Home)

ABOUT ME

AI Engineer focused on building AI-powered applications using LLMs, RAG, agentic systems, automation, and backend APIs that deliver real-world impact. Computer Science graduate with a 3.76/4.00 CGPA, highest GPA in my class, and Cum Laude honors, with experience building production AI products and full-stack applications.

SKILLS

AI & Machine Learning

Machine Learning | Deep Learning | LLMs | RAG | Generative AI | Agentic AI | natural language processing | computer vision

AI/ML Frameworks

PyTorch | TensorFlow

Backend & Databases

FastAPI | Node.js | PostgreSQL | SQL | MongoDB

Development & Deployment

Python | React | Git | Docker | Application Deployment

WORK EXPERIENCE

AI ENGINEER – HORRIZON AI – 01/09/2025 – Current – LAHORE, PAKISTAN

Website: https://horrizonai.com/

- Developed and deployed production AI applications using Python, FastAPI, LLMs, RAG, agentic systems, and automation workflows.
- Handled the end-to-end development of **StatementAI**, an AI-powered bank statement analysis platform with document processing, structured financial-data extraction, agent tools, backend APIs, and subscription/payment workflows; optimized processing time from approximately 15–21 minutes to about 45 seconds.
- Built and delivered an **IRS RAG chatbot** end-to-end, processing and indexing approximately 18,000 unique IRS web pages into a vector database and implementing semantic retrieval, retrieval pipelines, and agent-based question answering.
- Contributed to **WeekViz**, a multi-tenant workforce-management SaaS platform, developing backend APIs, access-control workflows, data-management features, Stripe subscription billing, and AI-powered functionality.

SOFTWARE DEVELOPER – SOFTRICK SOLUTIONS – 01/01/2024 – 31/07/2025 – LAHORE, PAKISTAN

Website: https://softricksolutions.com/

- Developed and deployed full-stack web applications using React.js, Node.js, REST APIs, and databases.
- Built **AutozCare**, an e-commerce platform for automotive care products, including product catalogs and shopping features.

- Developed **AI Sayyed Engineering**, a business website for an industrial supplier of water-pump parts, mechanical seals, and related components, delivering a structured product-focused interface and responsive user experience.
- Built and maintained REST APIs, database integrations, and improving application performance.

PROJECTS

AI Pet Breed Recognition Platform (Final Year Project)

Developed an AI-powered pet breed recognition and e-service platform supporting automated identification across **139 cat and dog breeds**, alongside pet-related services and an administrative portal. Designed and implemented the computer-vision pipeline using **YOLOv8m-Seg for pet detection** and **Swin Transformer for breed classification**, achieving **91.31% Top-1 accuracy, 90.67% macro F1, and 99.15% Top-5 accuracy**. Developed the **FastAPI model-serving backend** and deployed the inference service using **Modal**, integrating the trained models with the wider application platform.

StatementAI

Developed an AI-powered bank statement analysis platform that allows users to upload and analyze financial statements, automatically extract transaction data from PDFs, csv and excel, categorize transactions, compare multiple statements, and ask data-grounded questions about their financial records. Designed and implemented the document-processing pipeline, transaction extraction and analysis workflows, and chatbot for answering. Optimized the processing pipeline, reducing analysis time from approximately **15–21 minutes** to about **45 seconds.**

IRS RAG ChatBot

Developed an AI-powered question-answering system for querying **U.S. Internal Revenue Service (IRS) information** using a retrieval-augmented generation (RAG) architecture. Collected, processed, and indexed approximately **18,000 unique English IRS web pages** into a vector database for semantic retrieval. Implemented the retrieval and question-answering pipeline using **FastAPI and PydanticAI**, integrating an LLM-based agent to retrieve relevant source information and generate grounded responses.

WeekViz

Developed and contributed to a production multi-tenant workforce-management platform covering **attendance, timesheets, payroll, leave management, subscriptions, and project management**. Built the administrative panel and implemented **Stripe subscription billing**, including **pro-rated seat-based pricing and subscription changes**. Developed backend APIs, access-control workflows, and data-management features supporting multiple organizations and their employees.

EDUCATION AND TRAINING

Lahore, Pakistan
BACHELOR OF SCIENCE IN COMPUTER SCIENCE Bahria University, Lahore Campus

Computer Science; Artificial Intelligence; Machine Learning; Computer Vision; Data Science; Data Structures; Databases; Software Engineering. CGPA: 3.76/4.00. Merit/position-holder scholarship; highest GPA in the class/class position holder.

CERTIFICATIONS

Coursera, 01/11/2024
Python for Data Science, AI & Development

Python programming, data science foundations, AI, and development. Credential ID: 8PMR0I4XXXXQ.

Mode of learning: Online
